

Apoorv Tripathi

Graduate Student at Florida Atlantic University

apoorvtripathi537@gmail.com | <https://www.linkedin.com/in/apoorv-tripathi-19b132178>

Boca Raton, Florida | 5618168454

I am currently doing research in Large Language Model application in Natural Language Processing. I am also working as a Data Science intern. I am quite passionate about machine learning and AI, and I am always looking for new problems to solve and new research questions to answer.

Work Experience

QA/Data Science Intern Lead Oct 2025 - Present

Kahani | New York, United States

1. Design and implement Kahani's data infrastructure for Pilot 2 and beyond (event tracking, schema design, pipelines with Firebase, Pub/Sub, Big Query, dashboards).
2. Define and monitor core product metrics (engagement, retention, symptom improvement) to evaluate product-market fit.

Product Operations Manager Jan 2024 - Jul 2024

ALLEN Digital | Bengaluru, Karnataka, India

1. Improved the non-tech queries turnaround time to an average of 2 days to a week.
2. Maintained and organized operations for 1000+ cohorts, ensuring daily workflow and documentation.

Program Manager Jun 2023 - Dec 2023

HeyCoach | Bengaluru, Karnataka, India

1. Led engagement initiatives, creating SOPs that enhanced cross-team communication.
2. Oversaw the development of a learning product called DSA Visualizer which improved the user engagement on the website.

Operations Associate Nov 2021 - Jun 2023

Newton School | Bengaluru, Karnataka, India

1. Boosted student experience scores (NPS) by 40% through process improvements and feedback analysis.
2. Managed a team of support associates improving student outreach to around 90%.

Projects

Multi-RAG based Named entity recognition for clinical data

Aug 2025 - Present

This research aims to improve medical Named Entity Recognition by enhancing an existing system that uses Large Language Models and Retrieval Augmented Generation.

Multi Agent Reinforcement learning application in constrained supply chains for dynamic pricing.

Oct 2025 - Present

This research aims to optimize dynamic pricing in applications like flight prices, carpooling prices, product pricing in e-commerce, ticketing in sports/events etc.

Construction Defects Classification using Convocational Neural Networks

Sep 2025 - Present

The project aims to automate defect detection from images, improve site safety, and reduce inspection cost by providing an image inference API (planned AWS deployment).

Support automation using Agentic AI

Sep 2025 - Oct 2025

An agentic AI system implemented using Lang chain that automatically classifies the support issue using neural networks and schedules customer support tickets.

Core Skills

Scikit-Learn, Data Structure, DSA, Python, Natural Language Processing (NLP), Docker, Power BI , MongoDB, Machine learning, Fast API, Keras, Deep Learning, Lang Chain, Model Context Protocol, Google Big Query, Pytorch

Education

Florida Atlantic University Aug 2024 - Aug 2026

Master of Science - MS Computer Science

GPA: 3.78

SRM IST Chennai Jan 2017 - Jan 2021

BTech - Bachelor of Technology Information Technology

GPA: 6.8

Publications

IoT Based Smart Farm Monitoring System

Nov 2019

International Journal of Recent Technology and Engineering (IJRTE) Nov 20, 2019
